

## First Visit (Baan Nong Taa Kaew School)

On the 15<sup>th</sup> and 16<sup>th</sup> of February, our group went to visit our target school: Baan Nong Taa Kaew for the first time. We were very excited because this was our chance to obtain information needed in order to decide on the best way to help the school and its students.

During the visit, we met with the headmaster. He was very happy that we have taken interest in his school and our willingness to bring about improvements to the school in various ways. We were very fortunate to be given the opportunity to share and discuss our ideas with the teachers and children in most of the classes. At that time there were around 146 students in Kindergarten and Primary Levels and 69 students in the Secondary Level, totaling to approximately 215.

After asking the students and school staff about what they needed and what will benefit them most, we held a meeting in order to prioritize their needs and requests.
